THE REALITY OF COLD-WEATHER DUTY

THE SHIFT DOESN'T END WHEN THE TEMPERATURE DROPS.

Motor patrol, traffic details, special events, outdoor posts and long-duration assignments don't stop because the weather gets ugly. California Heat builds heated gear around the realities of extended cold exposure.

Stay focused on the assignment — not on staying warm.

CHOOSE THE RIGHT SYSTEM

TWO SYSTEMS. DIFFERENT ASSIGNMENTS.

We'll help you determine the right power source, product configuration and connection setup for each officer and assignment.
